

Control your business  
from wherever you are

## Auvit<sup>TM</sup> ERP. A Positive Relationship. Forever...

- Today's businesses demand real time, validated information to make critical decisions. When you are able to make informed decisions, business becomes a pleasure. Auvit<sup>TM</sup> ERP makes decision making a snap, no matter wherever you are. Auvit<sup>TM</sup> ERP is the most comprehensive tool developed from ground-up for discrete and process batch manufacturing industries, combining our more than 23 years of legacy in development of manufacturing and accounting software products with the latest technological innovations
- With our decades of experience, we bring extensive functionality without the complexity
- Say goodbye to expensive customizations and runaway implementations. Auvit<sup>TM</sup> ERP ushers in an era of freshness and power to easily support your unique business processes not only during implementation but also post go-live, for years to come, keeping pace with changes in your business climate

## Auvit<sup>TM</sup> ERP with its Ready-to-Implement Rich Functionality:

- Improves visibility of your operational metrics thus giving you better control over your enterprise
- Streamlines processes by adopting industry best practices thereby improving operational efficiencies ultimately resulting in saving costs
- Minimizes erroneous data collection in the warehouse by enabling PDA's with barcodes/ QR codes
- Speeds up production data acquisition by acquiring machine output data directly (where available)
- Empowers employees by giving them secure access to real time enterprise information and allowing them to act from anywhere anytime using any mobile device so that no transaction is delayed
- Enables an efficient supply chain via Auvit Vendor Portal
- Comes embedded with Business Intelligence [BI] Dashboards

## Auvit<sup>TM</sup> ERP is designed for executives on the move

- Auvit<sup>TM</sup> ERP employs the latest technology
- Deploy on the cloud or on-premise servers
- Supports BYOD concept. PC/ Notebook/ IPAD/ Android Tablet
- Needs only a browser and an internet connection on the client-side
- Mobile workforce can be enabled with RIA on PDAs
